ABOUT US

OPIKAR is a family-owned company, with headquarter in Logatec, Slovenia-EU. Our company has been founded in year 1997 and has around 50 employees. Since its establishment, the company has been continuously and stably growing, in terms of number of employees, annual turnover and scope of service and product portfolio.

OPIKAR Group

- **OPIKAR s. p., Slovenia**
(Founded in 1997 –)
- **OPIKAR, klimatizacija in čisti prostori d. o. o., Slovenia** (Founded in 2016 –)
- **OPIKAR Lüftungs- und Reinraumtechnik GmbH, Germany** (Founded in 2020 –)

The companies are fully owned by the family and employ over 50 people. The annual income almost exceeds 10 million EUR. Our area of activity is the design and execution of HVAC and installation works, as well as cleanrooms in the most demanding industries, such as the pharmaceutical industry, food industry, microelectronic and semiconductor industry, automotive industry, healthcare, and other critical, strictly controlled, and regulated environments.

Our current focus lie on the DACH regions, the Benelux countries and Nordic. All our companies utilise the TÜV Austria-certified quality management systems ISO 9001, the environmental management system ISO 14001, the occupational health and safety management system ISO 45001, and the certification of welding quality system ISO 3834.

Furthermore, our activities include engineering, design, 2D/3D modelling, and in-house manufacturing and assembly of cleanrooms for the healthcare industry (hospitals, clinics, etc.).

This includes modular operating rooms and other important functional hospital spaces. In this area, besides European markets, we place a significant emphasis on the markets in the Gulf states (Middle East).

- **OPIKAR Nepremičnine d. o. o., Slovenia**
(Founded in 2019 –)

The company's main activity is leasing our real estate and building new multi-dwelling premises for sales purposes. We devote attention to developing investment and real estate projects, such as reconstructions, adaptations, and energy renovations of old buildings.

- **OPIKAR Pohištvo d. o. o., Slovenia**
(Founded in 2024 –)

OPIKAR Furniture was created in 2024 with the acquisition of a local company (TIMO Furniture founded in 1996).

We are expanding our current offer and range of customers and further increase its array of pharmaceutical and medical customers through the manufacture of specialised, purpose-built HPL products and other high-quality materials. We cooperate with many world-renowned architectural and design offices that specialise in interior design and furnishing. Company specialises also in manufacturing of wood furniture for hospitality/offices.

INTERIOR EQUIPMENT TAILORED TO YOUR NEEDS

We specialise in manufacturing furniture and interior design based on customer requests. We constantly adapt to market trends and draw on our expertise and experience to use new materials and develop new pieces of furniture. For us, getting to know the customers and their wishes and demands is paramount, which drives us to find the best solutions. Our furniture allows you to create spaces that reflect your personal style while ensuring comfort and a pleasant climate.

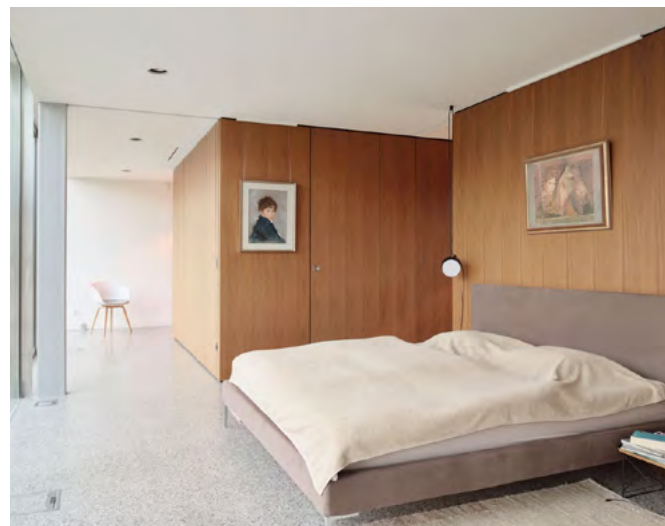

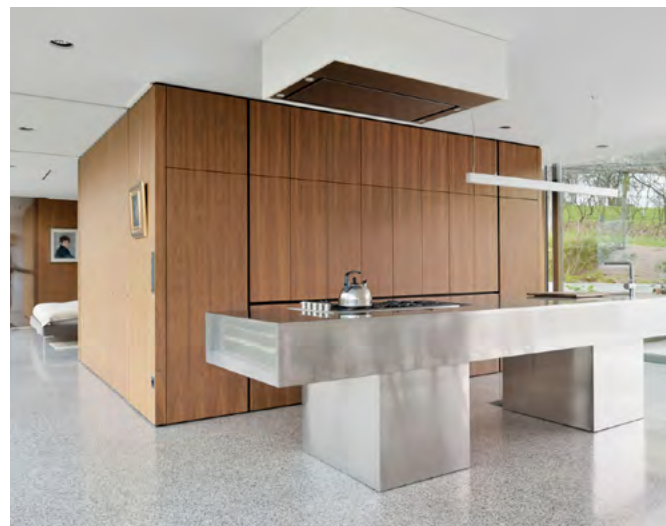

HOUSE MRAZ

Project: **House Mraz**
Project by: **Arhitekti Počivašek Petranovič**
Photos: **Miran Kambič**

Arhitekti Počivašek Petranovič have created a two-story residential house in the vicinity of Celje, which blends beautifully with the green surroundings and resembles a glass pavilion. The reflective surfaces of the upper floor's facade allow the house to become a part of nature, while the large glass areas ensure a seamless connection between the interior and the exterior, offering a stunning view of the nearby orchard and Celje Castle.

Our team custom-made all the furniture for this house. On the ground floor, there are three wooden service boxes – a bathroom, a toilet, and a wardrobe – with sliding doors that allow the space to open up into a large, unified area or to be divided into individual rooms as needed. All visible parts of these boxes are clad in American walnut veneer, finished with a matte lacquer. In the kitchen, where wooden elements intertwine with black grooves, there is a large kitchen island set on two cubes and made of stainless steel, adding a modern and elegant touch to the space.

APARTMENT RD

Project: **Apartment RD**
Project by: **Studio Tina Rugelj arhitektura+oblikovanje**
Photos: **Janez Marolt**

In collaboration with Studio Tina Rugelj, we designed and furnished a stunning apartment in a multi-apartment building in Ljubljana. Spanning approximately 130 m² across two floors, the apartment is connected by a central wooden staircase, adding an elegant and refined touch to the home.

The interior design is open and bright, with wooden accents creating a cozy and homely atmosphere. The furniture is crafted from premium materials, featuring painted MDF in warm, earthy tones, complemented by laminate in light and oak decor, textile coverings, and solid oak wood accents. These carefully selected elements achieve a perfect balance between functionality and aesthetics, making this apartment uniquely attractive and comfortable for living.

APARTMENT MESARSKA

Project: Apartment Mesarska
Project by: Arhitekti Počivašek Petranovič
Photos: Urban Petranović

In the residential complex Poljansko nabrežje on Mesarska Street in Ljubljana, we crafted furniture and interior doors for an apartment according to the plans of the architects Počivašek Petranovič. During the renovation, the architects expanded the living area by incorporating balconies, providing the apartment with more light and spaciousness. The spatial design and layout of the equipment are open and functional, with plenty of room for plants.

The interior design features predominantly white shades, with painted MDF as the primary material. The kitchen island, which extends into the dining table, is made of oak veneer. The cabinets in the kitchen niche, hidden behind tall folding doors, are made of bleached birch plywood. The countertop with the sink and the wall covering is made of stainless steel.

A HOUSE FOR FIVE AND A WORLD OF FRIENDS

Project: A house for five and a world of friends
Project by: Biro Gašperič
Photos: Miran Kambič, Biro Gašperič photo archive

Designed by architect Matej Gašperič, this wooden house in Logatec is tailored for an active and sociable family of five, surrounded by meadows and forests. The structure is laid out in two parallel volumes across three levels, including a semi-underground basement. The home covers 210 m² of usable space featuring four bedrooms, two bathrooms, a sauna, a fitness room, a spacious office, a large living-kitchen area, two terraces, a garage, a utility room, and a storage room. We furnished the entire house, opting for furniture in white and anthracite tones that complement the bright, naturally lit spaces surrounded by light wood. This design creates a warm, inviting, and functional living environment that enhances family interaction and active living.

(UN)CURTAIN OFFICE

Project: (UN)CURTAIN OFFICE
Project by: Dekleva Gregorič architects
Photos: Janez Marolt, www.marolt-photography.com

In the heart of Ljubljana, in collaboration with the architectural firm Dekleva Gregorič architects, we co-created the furnishings for office spaces. Designed solution leverages curtains to offer flexibility and versatile usability to the open floor plan. We manufactured all the built-in equipment, including interior doors, fitted cabinets, closets and the kitchen. The predominant material is painted MDF, which gives the space a warm and contemporary look, while the kitchen countertop is made of stainless steel, chosen for its durability and clean aesthetic. This concept combines functionality and aesthetic appeal, with each element contributing to the overall image and efficiency of the work environment.

HOUSE R

Project: House R
Project by: Bevk Perović architects
Photos: Miran Kambič, www.mirankambic.com

The holiday home in the vicinity of Lake Bohinj represents a symbiosis of modern design and respect for the natural environment and local heritage. Built on the foundations of its predecessor, it adheres to strict environmental regulations that guide its shape and material selection. The facade, made of wooden panel construction, equipped with sliding parts, allows for complete integration with the surrounding nature by concealing or revealing windows, doors, and the ground-floor terrace as needed.

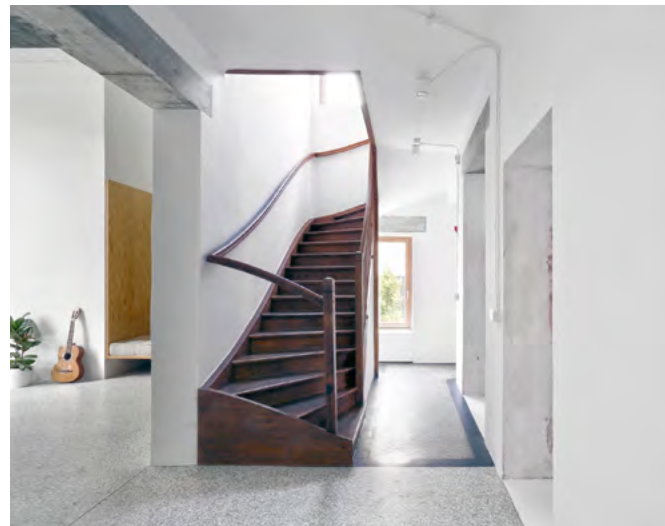

We have crafted furniture for the entire house using high-quality materials such as ultrapas and painted MDF in light tones, along with bleached oak veneer used for accents. This combination of materials creates a bright, airy, and inviting interior that reflects the purity and simplicity of the surrounding nature while also bringing a sense of warmth and homeliness.

HOUSE T

Project: **House T**
Project by: **Bevk Perović architects**
Photos: **Urban Petranović**, www.urbanpetranovic.com

In Ljubljana, we collaborated with Bevk Perović architects to furnish the renovated house on Koblarjeva Street. The property spans three floors, which were redesigned and interconnected during the renovation to create a dynamic living environment. The interior design showcases bright and open living spaces with modern furniture that beautifully complements the rough, colorful plasters, visible concrete parts, and a carefully renovated wooden staircase. The kitchen boasts stainless steel elements that provide a modern and industrial look, while the benches and room furniture made from bonded plywood of Brazilian pine ensure durability and warmth of the material. The white elements are made of laminate and painted MDF material, together creating a thoughtful and aesthetically refined living environment.

COMPACT KARST HOUSE

Project: **Compact Karst house**
Project by: **Dekleva Gregorič architects**
Photos: **Janez Marolt**, www.marolt-photography.com

The architects followed tradition and designed a compact single-family house that, in its form and choice of materials, reflects traditional local architecture, while also being technologically advanced and adapted to the needs of modern living. The house in Vrhovlje, with an area of 92 square meters, externally acts as a stone gabled monolith, into which two wooden volumes are inserted, interconnected by a bridge. On the ground floor are located the kitchen, dining room, and bathroom, while the first floor houses the bedroom and children's room.

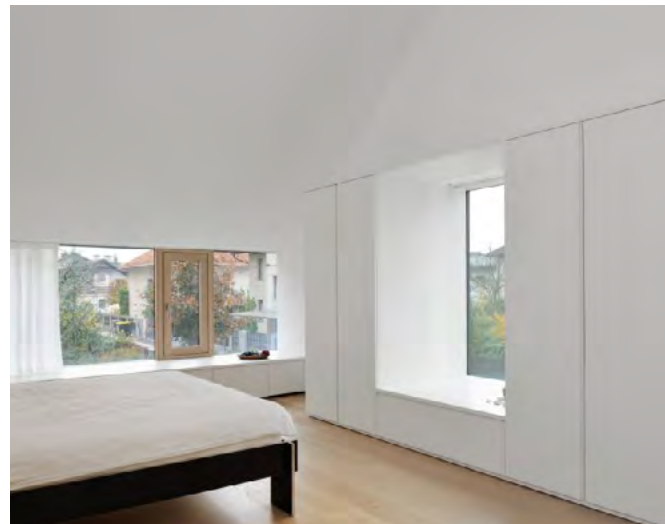

The external appearance of the house is shaped by concrete and stone, while the interior uses wood, metal, and textiles. We furnished the entire interior, including wall claddings, interior doors, and stairs. The predominant material is bleached three-layer spruce wood, combined with smaller segments of painted MDF for built-in wardrobes and matte black laminate in the kitchen.

HOUSE JP

Project: House JP
Project by: Bevk Perović architects
Photos: Miran Kambič, www.mirankambic.com

Following the plans of the Bevk Perović arhitekti, we furnished a single-family residential house in Bežigrad, Ljubljana, situated on a smaller plot with a lawn. The exterior of the house is defined by a modern, anthracite aluminum cladding, providing a contemporary and elegant appearance. In contrast, the interior reveals an opposite approach - the spaces are designed to be open, with large areas and abundant natural light, creating a sense of spaciousness and freshness. The interior design prominently features the use of painted MDF, adding warmth and a homely feel to the spaces. Highlight materials such as white Kerrock for the kitchen island countertop, ensuring durability and easy maintenance, and laminate stairs (hpl) have been chosen for their emphasis on functionality and as visual elements in the space.

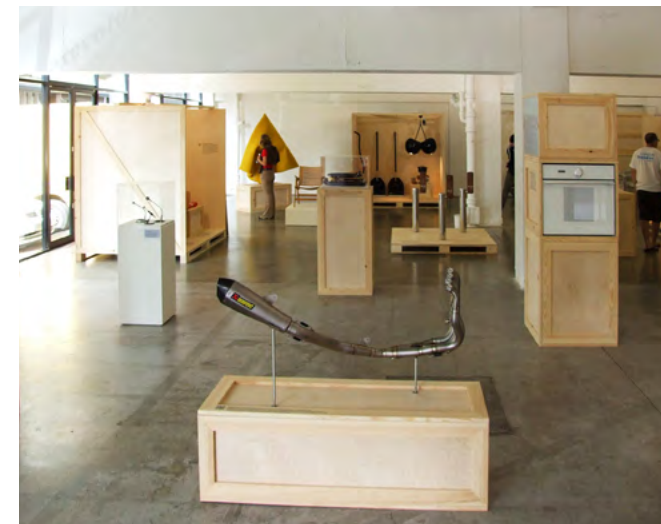

SILENT REVOLUTIONS; CONTEMPORARY DESIGN IN SLOVENIA

Project: Silent revolutions;
Contemporary design in Slovenia
Production: MAO,
Museum for architecture and design, Ljubljana
Photos: Anthony Milton (London)

The exhibition "Silent Revolutions: Contemporary Design in Slovenia," first presented in London in 2011, highlighted the significance of Slovenian product design on the international stage. The works of more than 25 designers showcased the first two decades of development and innovation in independent Slovenia. The exhibition was later also presented in other foreign locations (Netherlands, Italy, Austria, Russia, etc.).

For the execution of the exhibition, multifunctional transport elements were created that also served as display settings. Materials such as birch plywood and solid pine ensured quality and durability. White bases made from painted MDF and plexiglass covers added a modern visual contrast and provided protection for the displayed items. Pallet bases and larger boxes facilitated the proper presentation of larger exhibits. After the exhibitions, all elements were meticulously refurbished, extending their lifespan and preserving their visual impact.

FURNITURE FOR HEALTHCARE, PHARMACEUTICAL INDUSTRIES AND LAB FACILITIES

We offer a wider range of specialised furniture products for healthcare and pharmaceutical industries, all designed for functionality, safety, and comfort. We can manufacture and customise our furniture for use in medical facilities, clinics, elder care facilities, and other environments where special, critical care is required for the comfort and well-being of patients. We also provide equipment for pharmacies and rooms in the pharmaceutical industry.

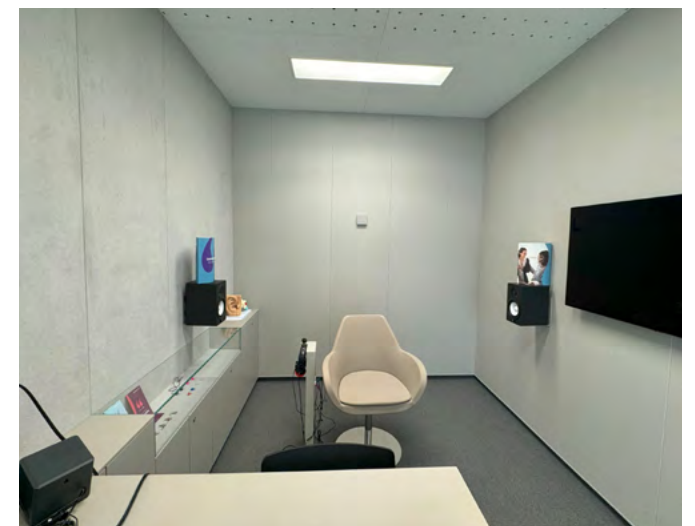

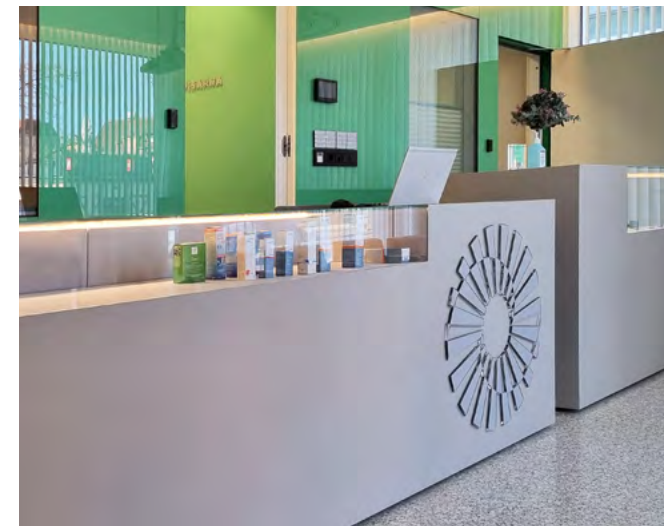

ORL MEDICINA

Project: ORL medicina
Project by: Arhitektura Krušec
Photos: ORL medicina archive

In Ljubljana, in collaboration with architects from the Arhitektura Krušec studio, we have designed the entire interior of the ORL medicina clinic, a center for comprehensive treatment of otorhinolaryngology diseases.

The interior of the clinic is designed in a light gray and green color scheme, creating a pleasant and soothing environment for patients. The spaces are dominated by colored MDF, providing a modern and clean look. The counters in the examination rooms and reception area are made of FENIX material, which boasts a super matte surface known for its resistance to scratches, fingerprints, and easy maintenance. The interior features a blend of materials including wood, glass, and textiles.

SERVICES – FURNITURE MANUFACTURING

Nowadays, a state-of-the-art equipped manufacturing facility is practically necessary, yet it is the mastery of our employees that is paramount for us. The blend of craftsmanship and technology guarantees that our products are simultaneously contemporary and unique. We offer comprehensive solutions: consulting, conceptual design, design, manufacture, and installation.

DISCOVER OUR ADVANTAGES

OPIKAR is known as disciplined, reliable and very flexible partner where quality is guaranteed.

RELIABILITY

Projects and tasks are carried out responsibly, to completion and within agreed deadlines. Each employee understands their duties, responsibilities and authority and acts accordingly.

COLLABORATION / CO-OPERATION

We work with all stakeholders fairly and transparently. We support each other, share best practices and continuously improve OPIKAR's overall performance.

AGILITY

Agility is our way of operating. We manage changes during service delivery with resourcefulness and a practical approach.

EXPERTISE

We deliver expertise and implement optimal solutions for all stakeholders and the company. We continuously enhance our skills and competences.

WELL-ORGANISED APPROACH

Each of us employs a well-organised approach to own workload, enabling us to achieve the best possible results. Project work is carried out according to schedules. In case of deviations, work is organised in a way that ensures the project's objectives are met.
